Summary

Computer Science undergraduate skilled in backend and full-stack development with hands-on experience in building scalable platforms using Node.js, TypeScript, React, and PostgreSQL. Skilled in implementing secure authentication systems, designing RESTful APIs, and creating responsive user interfaces.

Education

Gokaraju Rangaraju Institute of Engineering and Technology

Sep. 2023 – Graduating July 2027

Bachelor of Technology in Computer Science and Engineering — Current CGPA: 8.67/10

Hyderabad, Telangana

Relevant Coursework

- Web Development
- Data Structures
- Object-Oriented Programming
- Database Management
- Operating System
- Computer Networks

Technical Skills

Languages: C, C++

Web Technologies: HTML/CSS, JavaScript, Typescript, React.js, Recoil, Tailwind CSS, Node.js

Databases: SQL, PostgreSQL, MongoDB

Libraries/Frameworks: Express.js, Prisma ORM, Shadcn

Developer Tools: VS Code, MySQL, Git, GitHub, Postman, Docker

Projects

LaterBox | *React, Node.js, TypeScript, PostgreSQL, Prisma ORM, React Query, TailwindCSS* Live Link — GitHub

- Developed a comprehensive link management platform enabling users to organize important links into categorized collections.
- Implemented advanced link organization features including category segregation, and collaborative category sharing.
- Integrated Google OAuth 2.0 with JWT-based authentication using refresh and access tokens for secure session management.
- Utilized Prisma ORM with PostgreSQL for efficient data modeling and handling of links, categories and user relationships .
- Designed responsive UI using React and Tailwind CSS with Recoil for state management and React Query for optimized data fetching.

OpenSoccer | *Reactjs, Node.js, TypeScript, TailwindCSS, Recoil, PostgreSQL, Prisma ORM* Live Link — GitHub

- Built a full-stack platform to explore open-source GitHub repositories with an interactive React frontend and a secure Node.js/TypeScript backend.
- Integrated Google OAuth 2.0 and JWTs for streamlined authentication and session handling.
- Modeled and managed relational data in PostgreSQL using Prisma ORM with efficient migrations.
- Developed advanced repository search with filters for language, stars, forks, and activity, alongside flexible sorting options.
- Created a responsive interface using Tailwind CSS and shadcn/ui, supported by Recoil for persistent state management.
- Enhanced reliability with Express middleware for validation, CORS policies, and error handling.

Course Selling Website Backend | *JavaScript, Express.js, Node.js, MongoDB* GitHub

- Built the backend for a course-selling platform using Express.js and Node.js, ensuring smooth handling of user requests.
- Integrated JWT-based authentication to securely manage user logins and access permissions.
- Designed RESTful APIs to support course creation, updates, and purchases, making it easy for users to interact with the platform.
- Used MongoDB to store user data, course details, and transactions, optimizing data retrieval and storage efficiency.
- Implemented middleware for validation and error handling, making the system more robust and secure.
